## HISTORY

As craft beer has emerged and grown, so has IPA! IPA has helped grow Craft Beer to what it is currently today. There are now many shapes and forms of IPA, but they all share bright aromatic hop aroma of citrus, tropical fruit, and pine.

To celebrate the grand opening of our second tasting room in Milwaukie, Oregon, pFriem Family Brewers joined forces with friends at Breakside Brewery for a collaborative IPA. This unique IPA was born from a shared passion for innovative brewing and a desire to create something truly special for the occasion. Combining expertise, we've carefully selected a blend of hops known for their vibrant tropical fruit character, to rest upon a light and dry malt bill that adds just a touch of sweetness from the use of rice. All resulting in a refreshing and flavorful beer that perfectly captures the celebratory spirit of this exciting occasion.

## TASTING NOTES

This crisp and refreshing IPA pours a brilliant straw gold with a pillowy white head. Expect a burst of juicy tropical aromas – think ripe papaya, succulent pineapple, and mango. The palate is clean and dry, with a subtle bitterness balancing the fruity sweetness. The slightest touch of dankness adds complexity, while the carbonation provides a lively effervescence. This is a vibrant, crisp and highly drinkable beer begging you for a second glass.
